DETAILED ACTION

On 9/20/02 a restriction requirement was mailed by the Office. Applicant properly responded to the restriction requirement on 1/30/03, however the response did not include sufficient fees for the extension of time. On 2/20/03 an Informality Re Payment of Fee was mailed informing applicant that an additional \$45 was due. On 3/12/03 applicant timely paid the additional fee due. Accordingly, the Notice of Abandonment mailed 4/22/03 is hereby vacated and an action on the merits follows.

Priority

1. This application discloses and claims only subject matter disclosed in prior Application No. 09/235,192, filed 1/22/1999, and names an inventor or inventors named in the prior application. Accordingly, this application may constitute a continuation or division. Should applicant desire to obtain the benefit of the 1/22/1999 filing date of the prior application, attention is directed to 35 U.S.C. 120 and 37 CFR 1.78.

Election/Restriction

2. Claims 1-3 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 10.

Art Unit: 3682

Information Disclosure Statement

3. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and M.E.P.. § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 4-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See M.E.P.. § 2172.01. The omitted structural cooperative relationships are: the structural relationship between the flywheel and the rest of the invention as claimed.

Art Unit: 3682

7. Claim 6 recites the limitation "the driven wheel(s) of said vehicle" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Tabor (US Pat. 3,858,674).

Tabor (US Pat. 3,858,674) discloses a wheeled vehicle (fig. 3) which includes a flywheel 9 for energy storage and a continuously variable transmission (CVT) (fig. 4; col.4/ln. 57) coupled in series to at least one wheel 19,19' of the vehicle and incorporating control of the CVT speed ratio based on feedback of CVT output torque;

a fixed ratio speed reducer is coupled in series between the flywheel 9 and the continuously variable transmission (CVT), and of a fixed ratio such that the flywheel and CVT operate within the specified design speed ranges for the flywheel and CVT respectively;

a clutch 11,35 with corresponding clutch actuation means 12 is coupled in series with the flywheel, the continuously variable transmission (CVT) and the driven wheel(s) of said vehicle, said clutch actuation means controlled by either manual or automatic action to completely

Art Unit: 3682

disengage said CVT from said driven wheel(s) when said wheeled vehicle is either at rest or the desired speed is lower than the speed corresponding to the lowest CVT ratio;

a prime mover 31 is coupled to the flywheel and is controlled to increase the rotational speed of the flywheel up the maximum design rotational speed of said flywheel.

FACSIMILE TRANSMISSION

Submission of your response by facsimile transmission is encouraged. Group 3600's facsimile number is (703) 305-3597. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence **not** permitted by facsimile transmission, see M.E.P.. 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check **should not be** submitting by facsimile transmission separately from the check.

Responses submitted by facsimile transmission should include a Certificate of Transmission (M.E.P.. 512). The following is an example of the format the certification might take:

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and M.E.P.. 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.
